

## Aralon Stockinette®;

Aralon Stockinette®; from Comfort Products combines Kevlar and Nylon to create a unique tubular stockinette with exceptional properties. The qualities of each of these materials allows for a stockinette that provides superior impact and fatigue resistance.

Aralon Stockinette®; is 40% stronger than fiberglass while weighing almost half as much. It also has a strength-to-weight ratio approximately two and one half times superior to fiberglass, and it eliminates itching!

Aralon Stockinette®; has excellent thermal stability with minimal changes in dimension through normal temperature changes. It is compatible with Polyester, Acrylic, Vinylester, Urethane, and Epoxy resins.

Aralon Stockinette®; requires no changes in normal fabrication methods and stretches like traditional stockinette.
