

## Bio-Wick®; One Ply Sock

A CoolMax® and Cotton Seamless Prosthetic Sock that wicks moisture and has anti-microbial protection!

The Bio-Wick Single Ply Prosthetic Sock is a unique one ply equivalent seamless sock. The CoolMax interior wicks moisture away from the skin keeping the wearer dry and comfortable. Moisture is transported to the Cotton outer layer of the sock where it can transfer moisture to the air or to another sock. The Bio-Wick sock provides great comfort thanks to the exceptional stretch that allows conformity to virtually any shape. The non-run construction allows the sock to be cut to length without unravelling.

Features of the Bio-Wick Sock include:

- Microsafe Anti-Microbial provides continuous protection against odor causing bacteria
- CoolMax fibers wick moisture away from the skin, keeping the wearer dry and comfortable
- Completely seamless design reduces risk of irritation
- Exceptional stretch conforms to virtually any shape
- Non-run construction allows for cutting to length without unravelling
- Can be used effectively for AK, BK, Symes and upper extremity applications
- Machine washable
- Available with a vulcanized 3S hole
