

BK Stump Shrinkers

BK Stump Shrinkers from Comfort Products combine durability and comfort into a product that is priced right for the value minded. The medium compression shrinker is lightweight and provides tapered compression from the closed distal end to the open proximal end. The Comfort Grip Top makes donning easy, especially for geriatric patients. The top can easily be rolled over the fingers to allow for donning with limited hand strength. The tough nylon cover is extremely durable, while the pocket toe design eliminates stitching on the distal end. This allows the stitches to be placed at the most comfortable position. A full range of sizes means there is a Comfort BK Stump Shrinker ideal for every BK amputee!

Features of the Comfort BK Stump Shrinker include:

- Tapered compression from the closed distal end to the open proximal end from 25mmHG to 20mmHG
- Pocket type toe with special side stitching for additional comfort
- Cotton Comfort Grip Top makes donning easier, especially helpful for geriatric patients
-
- Color coded toe seams for easy width identification
